#Problem 1

## Part 1

Given that “in a group of 113 patients with prostatic cancer, 79 have a positive diagnosis” and that “in a group of 217 individuals without prostatic cancer, 10 have a positive diagnosis,” we have the following table.

	With Prostatic Cancer	Without Prostatic Cancer
Test Positive (T)	79	10
Test Negative (T)	34	207
Total	113	217
